INCIDENT SUMMARY

The Wild 54 3328-228 well located between Ioka Lane and 7000 W is out of control. To regain control of the well they have been pumping freshwater down the well, and it has been releasing from the top. At this time 4,1000 gallons of water have released to the pad and sides of the pad.

They are working to contain released fluids to the well pad, and will complete clean-up when the well is back under control.

DNR and UDOGM have been on site and testing the released water. The tests have come back at 3,600 to 3,900 TDS.

XCL Energy has notified UDOGM, the county, BLM, the tribe, and the UDEQ District Engineer (who has conducted a site visit). Listed dates/times of notification are estimated.
