INCIDENT SUMMARY

Caller reported last night (4/12) EP Energy was bleeding pressure off well LB UTE 1-13A3, the well kicked, and began spraying oil across their site. The wind was blowing at high speeds and carried the oil off site onto tribal land. It is estimated 25 barrels of contamination blew out of the well on site, however it is unknown how much off site contamination there is. Contamination remained on native soil and a few sage brushes. No water was impacted. EP Energy is contracting Lindsey Welding Company to clean up on site contamination. Caller contacted BLM, Ute Tribe, and DOGM; however no one answered. They are waiting to hear back from the tribe to see what they want them to do for off site remedial actions.
