INCIDENT SUMMARY

A contractor was working on the wellhead of the X-8-9-17 well on the Monument Fed 21-17 location and pressure buildup in the line caused a pop off valve on a separator to blow, releasing an estimated 1/4 barrel (10.5 gallons) of crude oil in the form of a mist. Most of the leak stayed on the pad but an unknown amount was released off location. The spill is in the process of being cleaned up.
