INCIDENT SUMMARY

The reporting party has automated valves for the injection well at this location that are supposed to shut off when the alarm sounds. They did not shut off yesterday and overfilled the storage tanks. The overfill ran onto the site and then some continued off site.

The spill consisted of only water, no other products. No storm drains or water ways impacted. Approximately 75 barrels of water spilled, 40 were recovered and returned to the system and the remaining 35 soaked into the ground on site.
