INCIDENT SUMMARY

Caller reported a release of 2 barrels of yellow wax crude oil (or condensate) from a pipeline as a result of corrosion in the line. The oil spilled into a dry wash and moved 230 feet down gradient until stopping. A hydrovac is on site removing standing product, as well as removing the top 6 inches of soil. They will be taking soil samples to assess where contamination is still present.

Caller contacted Johnny Bowen at BLM, Richard Powell at DOGM, and will be contacting Nathan Hall with local DEQ.
