INCIDENT SUMMARY

The Pilot Travel Center is upgrading their dispensers and piping. During the removal process they used a PID to assess soils. Soil at two locations came back high on the PID and samples were collected for analysis. The DRO results were above screening levels in two samples. One was 6,800 mg/kg and the other was not reported to the duty officer.

This location has other historic releases that are being managed by the Division of Water Quality- see INR #13734 for details. These samples were not collected from a location within the known plume, but results may be impacted by these past releases. The facility ID is 9000055.
