INCIDENT SUMMARY

Caller is reporting the release of an estimated 100K MCF (measured cubic feet) of natural gas from a 12-inch poly line due to a rupture with ignition & fire. Caller related the coincidence of a high-speed chase past the site several minutes prior to eruption of the fire, though the cause is unknown at this time. The operator isolated and shut-in the line stopping the flow of gas to extinguish the fire. Fire Dept responded to extinguish residual fire resulting from heat of the damaged line. Location given Lat:40.20496, Long: -109.96129.
