INCIDENT SUMMARY

Caller reported that pipeline corrosion resulted in the release of 10 barrels (bbls) of produced water to the ground surface. Some of the released produced water ran outside the right-of-way into a low area with ponded rain water. A vac-truck was sent to the release location to recover the produced water and remove the top layer of soil. Due to dry, windy conditions much of the release had soaked into the soils. Release occurred on May 7, 2022.
