INCIDENT SUMMARY

An underground water disposal pipeline leaked 34 barrels of produced water and 0.5 crude oil. The material leaked underground and surfaced at the incident location. The material was released to soil and is not near a waterway. The area of the release is on private land, is out of containment, and not on the lease.

They are sending a crew to remediate the area. The third party contractor will be Lindsay Welding Services, daniellindsay8200@gmail.com. Contact Dan Huber with Javelin Energy Partners for details about the cleanup. They plan to clean up whatever they can with a shovel and then flush with freshwater. The landowner does not want them to dig up the sod.
