UTM:	(E) 513582 (N) 4452198	Land Ownership:	Private

INCIDENT SUMMARY

The caller is a citizen with extensive experience with septic systems and installation. He is calling to report a property that has been occupied for approximately 3 years, and does not have a septic system or water system. He states that the property owner hauls in all of his water, and releases septic materials straight to the ground at the property. With the high water this year, the reporting party is especially concerned with potential contamination.

He has previously reported the property owner to the health department, but has seen no change in the sewage management at the property.

The reporting party would like to remain anonymous- the duty officer has his contact information and permission to share those details with agencies who are following up on the response.
