INCIDENT SUMMARY

Finley Resources contracted a water hauler to pick up a load of produced water, and the water hauler dumped the load off location instead of transporting it to the correct location for disposal. They estimate that the load dumped was 260 barrels of produced water.

A crew went out to collect contaminated soils, and hauled it to EEI disposal. Next they plan to spread microblaze on affected vegetation and will conduct soil sampling. They are currently investigating the incident to determine how this dumping occurred and who is responsible.

Have contacted the land owner, and will be contacting UDOGM following this notification.
