INCIDENT SUMMARY

SITLA staff conducted a site visit the AV 2-22 well, and found a release from the storage tanks on site. It looks like the pressure relief valve burst, and sprayed condensate over the tanks, and site soils. An unknown quantity was released. it appeared to the staff on site that the release was a couple of days old, exact date of release is unknown.

There have been no clean-up or mitigation activities taken at the site so far.

SITLA is requesting follow-up from DEQ for clean-up guidance and will assist as an intermediary to ensure the property owner takes proper steps.
