	2/26/2020	Tri-County HD	Site Visit	I visited the site this morning with David Hackford, and 2 other employees of DOGM. Met Shane Rowley of EP on site. Took video. DOGM had a TDS meter which they used to take readings from the spill to the pond. EP is currently flushing the area with fresh water and preparing to install a new section of pipe. The water in the pond is being pumped to a load out near the pond. These trucks are hauling the water to there pipeline disposal system beyond the break. It appears that the spill did not go beyond the pond. I have GPS coordinates if needed but I have updated the map..Did not collect water samples because DOGM had the TDS meter. Did not see much oil, only a yellow tint to the water. Shane said they are working with the private land owner.
