INCIDENT SUMMARY

Caller reported that a Pilot Transportation driver left his semi-truck during refueling which resulted in the release of 10-20 gallons of diesel fuel from the overfilled saddle tank. The diesel fuel ran across the asphalt to a concrete swale and into a small storm-water retention pond on the west side of the property. The retention pond has no outlets. Lincoln Environmental was contracted for cleanup and used absorbent pads and booms to contain and collect the release. A few booms were left in the retention pond in anticipation of incoming rains.
