INCIDENT SUMMARY

Approximately 8 barrels of produced water were released to the underground and surface areas of a underground water disposal line. It is likely that the cause of the spill was pipe fatigue.

Javelin Energy Partners isolated the line and turned off flow to the line. They are sending a crew to remediate the area. The third party contractor will likely be Lindsay Welding Services, daniellindsay8200@gmail.com. Contact Dan Huber with Javelin Energy Partners for details about the cleanup.

The area will be remediated by flushing the area with fresh water and then vacuuming the water.
