INCIDENT SUMMARY

Caller reported release to soils of an estimated 67 gallons of hydraulic fluid. Incident occurred due to hose failure on an overburden drill (unit #1822) working on a drill pad in Pit #102. No impact to surface waters or storm drains. After the machine is repaired, crew will move it and proceed to excavate contaminated soils into on-site waste storage for delivery to appropriate county waste disposal facility. A yet to be determined volume of antifreeze was released, which they anticipate to be small volume.
